

AFTER THE FLOOD: Community Input and Recovery Project

***Your input can help guide
flood preparation strategies.***

Richland County residents, business owners, elected officials, emergency responders and other parties affected by the October 2015 flood are asked to attend an upcoming meeting to help us collect information, photos and comments about the particular areas devastated by floodwaters.

Your input about how the flood affected your home or business will help Richland County prepare for future floods in Lower Richland County, Gills Creek Watershed and Stoop Creek Watershed.

Please bring pictures and other records that document how floodwaters affected your home or business.
